

Afterglow

Leony

People come and people go
Yeah that's the way it goes
Light up the darkness, made it glow
You turned the dust to gold
Oh, your words engraved in my soul

You turned the tide, you stopped the rain
You guide me to the Shore
In the middle of a hurricane
Your smile's the antidote
Oh, your words engraved in my soul

And I still hear your voice in the wind that blows
When you held me tight and you whispered close
Darling don't give up when you're losing hope
You will find all you need in the afterglow
You will find all you need in the afterglow

You left a thousand pieces
Made me feel like broken glass
But the flowers grew whenever you
Stepped foot right on the grass
Oh you'll be forever in my heart

And I still hear your voice in the wind that blows
When you held me tight and you whispered close
Darling don't give up when you're losing hope
You will find all you need in the afterglow
You will find all you need in the afterglow

And I still hear your voice in the wind that blows
When you held me tight and you whispered close
Darling don't give up when you're losing hope
You will find all you need in the afterglow
You will find all you need in the afterglow

And I still hear your voice in the wind that blows
When you held me tight and you whispered close
Darling don't give up when you're losing hope
You will find all you need in the afterglow
You will find all you need in the afterglow

Darling don't give up when you're losing hope
You will find all you need in the afterglow
You will find all you need in the afterglow
