

Aeolus Shadow

Leprous

I fear my own shadow
In the city smoke
Like a wave's undertow
The silence awoke

The city lights are blending
My eyes and my soul
Differs not day from night
Entering black hole

As the wind sweeps the city-sky
Aeolus casts his shadow
Metropolis at his feet
As noise explodes to silence

As total chaos is unleashed
The storm eats the city heart
Pandemonium is released
Damnation of true art

No escaping the truth
The gardens all dead
No more light to inhale
The beast have been fed

I feel my own shadow
Creeping up on me
Like a wave's undertow
I am not to be
