

Mirage

Leprous

Join in with me, with me
We'll fly on someone else's wings
To where everybody is one

Above the sky we read
It's written black on white
The truth, follow the lead

Echoes of the same old psalm
Sing with me, with me
In unity
Join in with me

I have been trying to break out for too long
From the cage
I found my path when I thought that I was wrong
I have been trying to break out for too long
From the cage
I found my path when I thought that I was wrong

Stay close to me, to me
I'll show you what you need to see
To see

Close your eyes
Trust in me
I'll be your guide blindly

Join in with me, with me
I will be your guide

I have been trying to break out for so long
I found my path when I thought that I was wrong
I have been trying to break out for too long
From the cage
I found my path when I thought that I was wrong

I have been trying to break out for too long
From the cage
I found my path when I thought that I was wrong
I have been trying to break out for too long
From the cage
I found my path when I thought that I was wrong
