

## A Killer Inside

Lera Lynn

A Ghost in the mirror  
And the hounds of hell dancing in your eyes  
(Dancing in your eyes)  
A mouth sings tar, a river of evil  
Who climbed inside and tells these lies  
(Tells these lies)

Somebody screaming for help but no answer  
A feedback loop gone wrong  
Does it find you when you're all alone

Could there be a killer inside  
Could any hand turn a blade  
Nights are all a chemical high  
So the holes in the memory bleed and fade

You keep screaming for help but no answer  
Just a busy signal drone  
Does it find you when you're all alone

Could there be a killer inside  
Could any hand turn a blade  
Nights are all a chemical lie  
So the holes in the memory bleed and fade  
So the holes in the memory bleed  
Holes in the memory bleed

Everyone's looking to escape  
Everyone wants a way out  
From the sorrow  
Any way to stop the pain  
You keep calling for help but no answer  
Just your sound of your own voice  
On the other end of the telephone

Could there be a killer inside  
And these hands turn a blade  
Nights are all a chemical ride  
So the holes in my memory bleed and fade
