

# Dopamine

Leroy Sanchez

Hey there, I've got some news to share  
I have been readying everywhere  
But they haven't found the scientist  
To help you travel back in time

I know it's a little hard to bear  
That we can never go back when  
When I thought you were forever  
But you treat me like a nine to five

Yeah, "Sorries" can only take you so far  
Let me stop you before you start

I'm sure the way you feel is true  
But there're some things you can't undo  
Yeah you made some nice apologies  
I'm glad you think we're good  
But I don't need your sympathy  
I just need some dopamine

I heard about the multiverse  
And even if I could reverse  
All the time we had together  
You'd still be the worst version of you

You took a piece of me away  
And now I'm like a sad parade  
Having way too much tequila  
Meeting strangers, you have no clue, no

And "Sorries" can only take you so far  
Let me stop you before you start

I'm sure the way you feel is true  
But there're some things you can't undo  
Yeah you made some nice apologies  
I'm glad you think we're good  
But I don't need your sympathy  
I just need some dopamine

Someone to make me feel alive  
Someone to look me in the eye  
To hold me close  
Through the night

I'm sure the way you feel is true  
But there're some things you can't undo  
Yeah you made some nice apologies  
I'm glad you think we're good  
But I don't need your sympathy  
I just need some dopamine
