We went so high As if we had no weight As if we thought we both could fly We went so high We knew it wouldn't last We flew too high we flew too fast And whenyou think you're safe and sound Anywhere you go from there is down We went so high We left it all below We found another place to go We went so high We'll never come so near We'll never see it quite so clear 'Cause when you think you're safe and sound Anywhere you go from there is down We went so high

So high
