

Cold

Leslie Odom Jr.

You lost yourself on empty promises
Broken on the way
All you've ever known are dishonest men
Who don't ever change

So you're keepin' all your secrets
By you wrapped up tight
You're who I believe in
So I say goodnight

Don't listen to all you've been told
You can come in from the cold
And you know the safest place to be
Is right here next to me
Won't you come in from the cold?

I wanna help you ease the feeling
Weighing on your mind
You're looking for a reason
Running out of time

Quit keepin' all your secrets
By you wrapped up tight
You're who I believe in
So I say goodnight

Don't listen to all you've been told (Told)
You can come in from the cold (Cold)
And you know the safest place to be
Is right here next to me
Won't you come in from the cold? (Oh-ooh, woah, oh, woah)

I know your heart's telling you, "Run now"
Run so far away (Away)
And something's trying to reach out (Trying to reach out)
Shining into the grey (Light into the grey)
I know how hard it is to take a chance when it calls your name
So I pray (I pray, I pray)
I pray

Don't listen to all you've been told
You can come in from the cold (I'm here, I'm here, from the cold)
And you know the safest place to be
Is right here next to me
Won't you come in from the cold?
Won't you come in from the cold? (I pray)
Won't you come in from the cold?
