

## Good Sign

Less Than Jake

We are the pessimists, masters of what we missed  
The pages turn as we twist our words  
Between the facts and myth and poisoned patriots  
We fan the flames as our bridges burn

We were the first to say, let's throw it all away  
But now we're fighting through the doom and gloom  
The doom and gloom

It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign

We're quick to criticize, from every single side  
We labeled every story bored and stale  
Wasn't it you and me who said we don't believe  
There is a better place where nothing fails

We were the first to say, let's throw it all away  
But now we're fighting through the doom and gloom  
The doom and gloom

It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign

You said I was out of my head  
Every time I pretend to forget  
Everything I believe and regret, yeah

It's never felt this way before  
And we took it as a good sign  
It's never felt this way before

It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign  
It's never felt this way before  
And we took it as a good sign
