

Fool's Gold

Letdown.

The devil's got a hold on me
He took me down so far, I can't breathe
It was so dark but I could see
I let him take it all away from me
And he said

Watch, you'll never know making it hard
You'll always be there in the dark
When death is just taking too long
You know I see
The way you been looking at me
The way you been living the dream
You'll never know what you're made of

Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time

Now every day's the same
We burn a little, pass the flame
And every day, I'll take the blame
For what I've done, for who I've shamed
And all this time comes down to one
I never thought I'd miss the sun, yeah
When I was watching you
When I was watching you

Watch, you'll never know making it hard
You'll always be there in the dark
When death is just taking too long
You know I see
The way you been looking at me
The way you been living the dream
You'll never know what you're made of

Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time
Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time

Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time
Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time

The devil's got a hold on me
He took me down so far, I can't breathe
It was so dark but I could see

I let him take it all away from me

Save your life and save your time
Take these lines out
You never know with fool's gold
And I've been running out of time

The devil's got a hold on me
(Save your life and save your time)
He took me down so far, I can't breathe
It was so dark but I could see
(Take these lines out)
I let him take it all away from me
(You never know with fool's gold)
And I've been running out of time
