Infernal Warfare

Lethal

Thugging wings of death appear
Like birds of metal in the sky
Above the trees, they are near
In their blazing breath you'll fry

No use to run, it's too late
A sea of fire floats the ground
Chemical warfare's sealed your fate
Here is no mercy to be found

Hell descending from the sky
Infernal death has arrived
No use to run, no use to hide
Now it's certain you will die

Napalm burns your limbs apart
Shrieks of pain tear your soul
Chemical fire engulfs your heart
As your body turns to coal

Hell descending from the sky
Infernal death has arrived
No use to run, no use to hide
Now it's certain you will die

Flesh scorched into stone
Ashes float the atmosphere
All that's left is blackened bone
Infernal warfare glowing clear
