

It's Not Just Me

Let's Eat Grandma

And just when we discover that we need each other
Here, our lives keep pulling us away
Now we're both so unstable at the kitchen table
With these peanut bagels in a foreign state

Because the point is that I see it's not just me
The point is that you feel my company
I don't wanna say goodbye
Guess I'll see you when my screen is vibrating

It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me

Back then, I'd just decided I was so misguided
That you'd all forget about me, in time
Bet you remember it was New Year's Eve
Sparklers through Palaced streets
We knew though years do change
We'd always feel the same

Because the point is that I see it's not just me
The point is that you feel my company
You know I'll never be too far if you're looking for somebody
I'm here

It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me

Seems so hard you'll start to feel so
Good at not sweeping it under the carpet
It seems so hard you'll start to feel so
Good at not sweeping it under the carpet
I know when you know

It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me
I know you're feeling the same way
And I can't fail to believe
When you're feeling the same way
It's not just me
