

# Almost

Lewis Capaldi

Standing back but on the edge  
Wide awake but laid in bed  
The pain is real but I pretend  
That all the hurting has an end

Nowhere to run, nowhere to hide  
No way to live, no way to die  
Done all I can, all I do is try to get through the daylight

I swear to God I'm almost alright  
I only think about you all the time  
I almost never fall asleep wishing you were here with me  
And I promise I've completely let you go  
Almost

Talking circles 'round the room  
Like I've got a point to prove  
Every word except the truth  
To everybody else but you

Done all I can, all I do is try to get through another night

I swear to God I'm almost alright  
I only think about you all the time  
I almost never fall asleep wishing you were here with me  
And I promise I completely let you go

I swear to God I'm almost okay  
I only talk about you every day  
It almost never cut me deep when I had to watch you leave  
And I promise I completely let you go  
Almost  
Almost  
Almost

I swear to God I'm almost alright  
I only think about you all the time  
I almost never fall asleep wishing you were here with me  
And I promise I've completely let you go  
Almost
