

(bring you home)

Lewis Watson

Another lonely night and I'll lie here forever
If I could turn back time then we'd still be together
Right now what I'd give just to hold you
Cause if I try to rewind I know I would be better

We were perfect
Don't you remember

We were perfect

So if you let me start again
I want you to know
That I would make it better do anything that might bring you home
I'd never break your heart again
Undo what I've done
I know I didn't call you to tell you that I loved you enough
I know
I know

Said goodbye
Know I lied
Every night I regret it
And it's not right but in time could you try to forget it
Right now I
I really need you
But every time that you cry I know I'm taking credit

We were perfect
Don't you remember

We were perfect

So if you let me start again
I want you to know
That I would make it better do anything that might bring you home
I'd never break your heart again
Undo what I've done
I know I didn't call you to tell you that I loved you enough
I know
I know

We were perfect
Don't you remember

We were perfect

So if you let me start again
I want you to know
That I would make it better do anything that might bring you home
I'd never break your heart again
Undo what I've done
I know I didn't call you to tell you that I loved you enough
I know
I know
