

# Nothing At All

Lewis Watson

Called ourselves lovers just the other night  
Hidden under cover of the street light  
I knew I was coming when you shivered  
I knew that I'd be left hanging on your last word

Maybe we were drifting  
Maybe I was blind  
I guess I didn't notice  
The wool over my eyes

Going through the motions  
Trying to work out why  
The one's you hold the closest  
Always kill the light

It's using up  
The best in me  
'Cause all I know is all I've ever known  
Nothing at all  
I know nothing at all

You call me up blurry just the other night  
'Cause your fed up of crying through your tired eyes  
You said remember that summer by the river  
But I can't forget  
You broke me in the winter

Maybe we were drifting  
Maybe I was blind  
I guess I didn't notice  
The wool over my eyes

Going through the motions  
Trying to work out why  
The one's you hold the closest  
Always kill the light

It's using up  
The best in me  
And all I know is all I've ever known  
Nothing at all  
I know nothing at all

Maybe we were drifting  
Maybe I was blind  
I guess I didn't notice  
The wool over my eyes

Going through the motions  
Trying to work out why  
The one's you hold the closest  
Always kill the light

It's using up  
The best in me  
And all I know is all I've ever known

Nothing at all  
I know nothing at all
