

## out there somewhere

Lewis Watson

Will I feel like this forever?  
Live my life underneath the weather  
They tell me it always gets better, no  
But I've come to learn it never does

So why fight for something bigger?  
Got a shadow I can't get rid of  
But then you came into the picture, oh  
And brought that light you carry with ya, love

Grey skies  
Slow nights  
Wasted time  
If you were out there somewhere

First time  
Alive  
Dry my eyes  
'Cause you were out there somewhere

Wanna feel like this forever  
You taught me how to keep my head up  
Let's raise a family together, love  
And try to leave this cruel world better off

Sunrise  
New highs  
Dry my eyes  
'Cause you were out there somewhere

Time flies  
Dress, white  
Saved my life  
'Cause you were out there somewhere (Somewhere, somewhere)

Winter nights  
Left behind  
It's better when you're by my side

Midnight  
Roadside  
Flashing lights  
It came out of nowhere

Blind-side  
Tongue-tied  
No goodbye  
It came out of nowhere

Last sigh  
Flat line  
Hospital lights  
It came out of nowhere

Grey skies  
Black tie  
Though you've closed your eyes

You're still out there somewhere
