

# Bite The Dust

Lexa Gates

(Yeah, yeah, yeah)  
Another one bites the dust (Oh, oh, oh)  
(Ah, ah, ah) (What, what, what?)  
Another one bites the dust

I got no heart in me, I can't love you no more  
You done did too much to me that I just can't ignore  
I stay awake all night, I don't sleep anymore  
Don't feel no need to fight, baby, don't you see it's already over?  
This bed be so cold now  
There's space all around me, everywhere that I go  
I'ma have to forget 'bout everything that I know  
'Cause I thought you were the one  
You're just another one gone, so bite the dust

Yeah, you know I'm 'bout love, I don't fuck with the lust  
I'm not the type to get around with anyone, everyone, but  
You was for everyone  
I'd say I'm surprised  
But motherfuckers said, "Don't get caught in the lies," and I did  
Thinking what it could've been when there's nothing to do  
I tried my best with you, you don't see shit in me  
So go ahead and be the kind of person that you wanna be  
'Cause now I see, I'm looking right through you  
But there's nothing in there  
Ladies, please beware  
The world we live in is scary  
And no one really gives a fuck about you or anybody but themselves  
It's sick, you fuckin' make me sick bro (Damn)

Now I got no heart in me, I can't love you no more  
You done did too much to me that I just can't ignore  
I stay awake all night, I don't sleep anymore  
Don't feel no need to fight, baby, don't you see it's already over?  
This bed be so cold now  
There's space all around me, everywhere that I go  
I'ma have to forget 'bout everything that I know  
'Cause I thought you were the one  
You're just another one gone, so bite the dust

Take my pain for weakness, baby, love is vulnerability  
I'ma let my guard down, let you open up and play with me  
Keep me on my toes and you could suck them up and lay with me  
One day, I'll be gone, but for the meantime you could stay with me  
Nothing lasts forever  
You know I'd be down for you, it don't matter the weather  
Sometimes I just feel like we'd be happier together  
But I gotta do what's right for me, it's for the better

Now I got no heart in me, I can't love you no more  
You done did too much to me that I just can't ignore  
I stay awake all night, I don't sleep anymore  
Don't feel no need to fight, baby, don't you understand that it's over?  
This bed be so cold now (It's over)  
There's space all around me, everywhere that I go  
I'ma have to forget 'bout everything that I know  
'Cause I thought you were the one

You're just another one gone, so bite the dust  
(Yeah, y-y-yeah yeah yeah)  
Bite the dust  
(Yeah, yeah yeah yeah, yeah yeah yeah)  
Y-y-you're just another one  
Everything is fine, I'm just searching for meaning  
I bet you are too  
I wish you luck on your pursuit
