

Come and get it, ready or not  
The iron is hot every day  
Break me off a piece of your god  
If ever I lose my way

We're coming together  
And falling apart  
Making it all up, man  
It's still from the heart  
I know I ain't pretty  
I'm covered with scars  
But every day, every day I can feel that wave  
Happen

Happen

Got to keep my head in the clouds  
My feet on the trampoline  
Billion-dollar smile on my face  
I give it away for free  
My brother don't like me  
He's said it before  
Who threw the first stone, yeah  
And who's keeping score?  
Just trying to keep dancing  
My way to your door  
It's a rave, it's a rave, you can make that wave  
Happen

And when the meadow gets me  
I leave a beautiful sound behind  
I want to shake you sonny  
When I hear you say you think you're running away

Angels from above looking down  
See us kill the pretty green  
See the orange man doubling down  
He lives in a fantasy

Have faith in the future  
That's perfectly clear  
Let's stop the world burning  
Well, maybe next year  
Get together before  
It all ends in tears  
Every day, every day we could make that change

Happen  
Happen  
Happen
