Lido

The last time that we tried  
We was on the Southside  
In the front seat of your Honda ride  
But we ran out of time  
I love your body frame  
Your eyes light up when you say my name  
Got them tattoos  
Hit me like wassup gang  
Said promise me that you won't change  
I can't guarantee  
But I'm with you in the moment right now  
I can't guarantee  
But I'm with you in the moment right now

Can't guarantee, but I can entertain it  
Only with our eyes we speak a hidden language  
You tell me bout the town and how it's getting dangerous  
Every thing's the same, but they keep on changing  
You really wanna change up the people that you hanging with  
And I don't see your tough side  
I just see you a few days out the year, but that's not enough to judge by  
You worry bout life, I feel you though  
Them things on your mind - just let em go  
I got us a kit, and yea it's potent  
I'm finna fuck this bitch on X-Games mode
