

You Lost Your Keys

Lido

I can't decide what key you're in
You keep changing on me by the second
I can't decide what key you're in
You keep changing on me all the time
All the time

I can't decide what key you're in
You keep changing on me by the second
I can't decide what key you're in
You keep changing on me every day
Every day

I can't decide what key you're in
You keep changing for me by the second
I can't decide what key you're in
You keep changing for me by the second
Second

I can't decide what key you're in
You keep changing for me by the second
I can't decide what key you're in
You're in
What key you're in

So don't worry you're safe
Don't worry you're safe now
Don't worry you're safe
I could never write you

Cause I can't decide what key you're in
You keep changing on me every day
On me every day
I can't decide what key you're in
You keep changing on me
Changing on me
By the second
