

Better Part Of Me

Lifehouse

On my way to a place I know
At the end of the day, I can make my way out of here
And the lights burn my eyes
It reminds me of where I used to call my home

And the sun never looked so good from here
It's almost as if yesterday could disappear
I'm standing on the edge of what could be
Looking for the better part of me

Stand on your own
Turn and face your fears
It's the only way to know
What you've been living for all these years

And the sun never looked so good from here
It's almost as if yesterday could disappear
I'm standing on the edge of what could be
Looking for the better part of me

So tell me where to go
To find a better way out of this lonely place

I'm on the edge of what could be
Looking for the better part of me
Is there a life that death could bring?
Is this the better part of me?
