

Keep the Change

Lifehouse

Covered in rust outside your cage
The people you trust lock you away
The blood and the dust spell out your name
You know that it is your price to pay

This is your chance
To break these chains

So, where did it all go wrong?
Everything happened so fast
How could we both believe that this could ever last?
And if you're not moving on,
You can have the past
I'll keep the change

One way ride out of this grave
Into the sunlight that melts us away
The shadows at night kept you awake
Haunted by all of your mistakes

There is still time
To catch that train

So, where did it all go wrong?
Everything happened so fast
How could we both believe that this could ever last?
And if you're not moving on,
You can have the past
I'll keep the change

Follow the pieces of my heart
Back to the place where you are
To remind myself of where for I have come
And I emptied all these tears
That I saved up in a jar
Until these memories got dried up by the sun

So, where did it all go wrong?
Everything happened so fast
How could we both believe that this could ever last?
And if you're not moving on,
You can have the past
And I'll keep the change
You can have the past
I'll keep the change

You can have the past
I'll keep the change
