

Raise The Dead

Light The Torch

I have been hiding in plain sight
And no one knows
I am the void of each night
Where nothing grows

This could be for us the spark of life
(That we've waited for)
Even if you dare to draw the knife
(There is so much more)
We'll raise the dead tonight

Tomorrow is already changing
Now lift your eyes
This is ours for the taking
Don't be paralyzed

I crave so much more!

This could be for us the spark of life
(That we've waited for)
Even if you dare to draw the knife
(There is so much more)
We will raise the dead tonight

(There is so much more)
(There is so much more)

To the dearly departed
We've never left your side
To the dearly departed
We've never left your side!

This could be for us the spark of life
(That we've waited for)
Even if you dare to draw the knife
(There is so much more)
This could be for us the spark of life
(That we've waited for)
Even if you dare to draw the knife
(There is so much more)
We'll raise the dead tonight

We'll raise the dead tonight!
