# Virus

**Light The Torch**

An ocean between us is too close
Will you give up the ghost
You are a constant obsession
That hides before my eyes

Are you ready for the perfect deception?
The smiling face remains the same

Take this blade and release me
This is no way to live
Can you tear the veil from my dreams
And let me breathe again

I can feel you around me
Forever won't be far behind

You are horror from the point of conception
You were born within the gray

Take this blade and release me
This is no way to live
Can you tear the veil from my dreams
And let me breathe again

Can no one hear me?
Don't let the virus spread

Enslaved by the way that you move me
I'm enslaved by the way that you move me
Don't let the virus spread

Take this blade and release me
This is no way to live
Can you tear the veil from my dreams
And let me breathe again

Take this blade and release me
This is no way to live
Can you tear the veil from my dreams
And let me breathe again

Don't let the virus spread
Don't let the virus spread
