

# Body Right

## Light Up The Sky

I want to feel your body right  
I want to feel it next to mine  
And I just wanna... I just wanna hold you close  
And I will never let you go...my baby

The way you walk in the room it puts a spell on my every move  
The night is seconds away  
So let's use it all and not let it go to waste  
Go to waste... so let's stop fuckin' around

Cause I just want you to know

I want to feel your body right  
I want to feel it next to mine  
And I just wanna... I just wanna hold you close  
And I will never let you go... my baby

And I know all the ways I loved you  
You don't know all that ways that I've missed you  
And I know all the ways that I wanted you  
Now I'm needing you

Move! The way your body rocks on me  
It makes me feel something I can't explain

The waves are crashing over me  
I'm sinking down and I can't breathe  
Why did you do this to me baby

I want to feel your body right  
I want to feel it next to mine  
And I just wanna... I just wanna hold you close  
And I will never let you go... my baby

And I know all the ways I loved you  
You don't know all the ways that I've missed you  
And I know all the ways that I wanted you now I'm needing you

All the weight I hold tonight... seems to drift away from me  
With you only in my arms... keeps me from going insane

And I know all the ways I loved you  
And I know all the ways that I needed you

I want to feel your body right  
I want to feel it next to mine  
And I just wanna... I just wanna hold you close  
And I will never let you go... my baby

And I know all the ways I loved you  
You don't know all the ways that I've missed you  
And I know all the ways that I wanted you  
Now I'm needing you
