

Clouds

Lighthouse Family

You know when it's the one
You know if it's the real thing
'Cause suddenly everything
Feels so good
The one that lifts you up
Takes you onto better things
I bet you didn't ever think
It could be so good

Let go
Let go of your unhappiness
You shine like a star
You let me know where heaven is
In everything that you do

You're the sun above my clouds
I ain't ever coming down, oh no
Blue sky above my clouds
Don't wanna come back down

You know when it's the one
You know if it's the real thing
'Cause suddenly everything
Feels so good
The sky opens up
Showing you infinity
And now you can see everything
You never understood

Let go
Let go of your unhappiness
You shine like a star
You let me know where heaven is
In everything that you do

You're the sun above my clouds
I ain't ever coming down, oh no
Blue sky above my clouds
I don't wanna come back down

We're just floating out in space
Trying to find the better place
It gets dark here but I know
It's somewhere out there

You're the sun above my clouds
I ain't ever coming down, oh no
Blue sky above my clouds
I don't wanna come back down

You're the sun above my clouds
I ain't ever coming down, oh no
Blue sky above my clouds
Don't wanna come back down
