

# Alive Again

Lights

You like your music fast  
And the sex slow  
And the speakers hot  
And your calls cold  
Got your head high  
And your standards low

I hate the way they do  
I like the way you don't  
I see you wear your blues  
You see me chasing crows  
We got demons  
They never let us go  
And I don't even  
Need to know

This might be the night that I die  
And I don't want to die alone  
So come a little closer  
I don't even need to know your name

And when the sun comes crashing  
In the window  
And my heart still pounds  
At least I know  
That I had you  
But it's time to go  
And you don't even  
Need to know  
You don't even  
Need to know

This might be the night that I die  
And I don't want to die alone  
So come a little closer  
I don't even need to know your name

This might be the night that I die  
And I don't want to die alone  
So come a little closer  
I don't even need to know your name

I don't even need to know your name  
I don't even need to know your name  
I don't even need to know your name

I think I've been overcomplicating  
Everything, I just wanna feel alive again  
Alive again

I think I've been overcomplicating  
Everything, I just wanna feel alive again  
Alive again

I think I've been overcomplicating  
Everything, I just wanna feel alive again  
Alive again

(Alive again)

This might be the night that I die  
And I don't want to die alone (Alive again)  
So come a little closer  
I don't even need to know your name

This might be the night that I die  
And I don't want to die alone  
So come a little closer  
I don't even need to know your name

(Alive again)

I don't even need to know your name  
(Alive again)  
I don't even need to know your name  
(Alive again)
