

# Fight Club

Lights

It's feast or famine with you, isn't it?  
You're either all the way in, or you up and quit  
When we've run out of walls to hit  
We just walk away from it, walk away from it, walk away  
What ever happen to talkin it out?  
Always keeping our thoughts left in our mouths  
And the silence always starts to shouts  
Did we forget what it's about, -get what it's about, it's about?

It's getting heavy, you already know  
Crack in the levy is about to blow

Throw my hands up, 'cause I had enough  
It's going through my head, like it always does  
Come and show me what you're made of  
All these sacrifices for love  
Throw it up when push comes to shove  
Gonna have it out like fight club  
Fight club  
Gonna have it out like fight club

Well not the way you think your always right  
But we never talk it out, we just step all night  
Let's get out of the dark and into the light  
'Cause I don't want the drama, I just want the fight  
I just want the fight

Throw my hands up, 'cause I had enough  
It's going through my head, like it always does  
Come and show me what you're made of  
All these sacrifices for love  
Throw it up when push comes to shove  
Gonna have it out like fight club  
Fight club  
Gonna have it out like fight club  
Fight club  
Let's put it all behind us and make love
