

# Magnetic Field

Lights

Walk with me though the boneyard  
I know you like to play hard  
You know I'm easy to convince  
How you move through the spaces and can get so persuasive  
I haven't been home since  
'Cause this full metal alchemy  
Just brings up out the best in me each time  
Ooh-ooh, and all these sacred memories that summon me, oh my  
You just keep me coming back  
Something about our opposites attract  
You hold me down  
I'm in it for real  
Love me, leave me high and dry  
I'm back in your arms and I don't know why  
I can't get around your magnetic field  
Don't know if I believe you  
And when I try to leave you  
I can't turn around  
'Cause I can't keep my eyes away  
The chemistry begs me to stay each time  
Ooh-ooh, and all these sacred memories that summon me, oh my  
You just keep me coming back  
Something about our opposites attract  
You hold me down  
I'm in it for real  
Love me, leave me high and dry  
I'm back in your arms and I don't know why  
I can't get around your magnetic field  
If I leave I believe I could never settle  
'Cause I'm drawn to your core like a precious metal  
And you balance me out  
If I leave I believe I could never settle  
'Cause I'm drawn to your core like a precious metal  
And you balance me out  
And I can't live without  
Just keep me coming back  
Something about our opposites attract  
You hold me down  
I'm in it for real  
Love me, leave me high and dry  
I'm back in your arms and I don't know why  
I can't get around your magnetic field  
You just keep me coming back  
Something about our opposites attract  
You hold me down  
I'm in it for real  
Love me, leave me high and dry  
I'm back in your arms and I don't know why  
I can't get around your magnetic field
