

Morphine

Lights

I had my first good dream
Now that you're haunting me
Here, in between the sheets
Right where our two worlds meet
This must be the hour
Right before the daybreak
Leave behind the coldest blue ache
I had my first good dream
Now that you're here with me
When I call your name
I don't feel the burn
Standing in the flame, flame, flame, flame
We end up on the floor
You set my head free
I want you more and more
Don't wanna get clean
You're like morphine
You're like morphine
You're like morphine
You are my morphine
We never leave the room
I guess there's no need to
Nothing but me and you
Visions in bird's eye view
This must be the morning
Never saw it coming
I was tangled up in your limbs
We never leave the room
Now that I'm here with you
Again I call your name
I don't feel the burn
Standing in your flame, flame, flame
We end up on the floor
You set my head free
I want you more and more
Don't wanna get clean
You're like morphine
You're like morphine
You're like morphine
You are my morphine
You are my morphine
