

# Take It Easy

## Lights

I can hear you build your defenses  
I know you been posting the signs  
Learning from the best in the business  
I push it to the back of my mind  
You say I'm not hearing your story  
Acting like I'm wasting your time  
I been trying to pick up the pieces  
But you can barely drop me a line

Take it easy  
Baby, you come and go  
I know you're coming home  
Whether or not you know  
Take it easy  
Maybe you come and go  
Next time you're coming home  
You might be alone

3 a.m., you fall in  
Lock the door and drop the fob in  
Hit the floor, the night is calling  
I know it's the anger talking  
I'm just tryna follow your story  
But I think that I'm wasting my time  
You say you're not building defenses  
But I've already built mine

Take it easy  
Baby, you come and go  
I know you're coming home  
Whether or not you know  
Take it easy  
Maybe you come and go  
Next time you're coming home  
You might be alone

Next time you come home  
Next time you come home  
You might be alone  
You might be alone  
Next time you come home  
Next time you come home  
You might be alone  
You might be alone

Take it easy  
Baby, you come and go  
Next time you come home  
I know you're coming home  
Whether or not you know  
You might be alone  
Take it easy  
Maybe you come and go  
Next time you come home  
Next time you're coming home  
You might be alone

Take it easy  
Baby, you come and go  
I know you're coming home  
Whether or not you know  
Take it easy  
Maybe you come and go  
Next time you're coming home  
You might be alone
