

# Locked Up

Lil Durk

I can't see your face we talk through cell phones  
I salute you a thousand times cause you ain't say nothing  
It hurt your heart your kids keep telling you you a jailbird  
You don't complain when you don't get visits cause you get mail first  
You lost your guys, half your sentence and it still hurt  
Please don't think about the streets put your appeal first  
Before I ever tell a lie I get it real first  
Before I ever tell a lie I get the real dirt  
(Turn up)

When you was free you had them AK  
Whoever think that you'd be passing out a state tray  
And the squad was mad at Rio cause he ain't take eight  
23 years he's surviving off of Jpay  
And you ain't gotta send them money cause they stay straight  
Boona gotta do one more year I know he can't wait  
They steady throwin Law in the hole cause he gotta gang case  
And I be steady taking drugs to keep my pain away  
I done did so much time for my gun case  
Look in the mirror all I see is my son's face,  
And my daughters' and my mom's face  
The state came with a plea get outta my face  
You my friend, not my family it's a difference  
I know a killer who turned the city up he snitchin'  
I know you did so why you telling me you didn't  
But I know another killer who turned up as a witness  
Would say their name but know that that ain't none of my business  
You ain't tell on the gang so you say that shit ain't snitching  
Tryna throw up my gang, country scratching off the picture  
Gave the police some guns so they can lighten up they sentence  
Y'all daddy love y'all you gone hear him talking shit about me  
I'm from Chicago if you die then we didn't forget about you  
Fuck with that other side, not me you can't forget about it  
I witnessed a war inside my city, they kill anybody  
I know a nigga who ain't did it but he claimed the body  
Nigga get rocked out of town who just came to party  
And why you decide to play with me, my shorties insane about me  
Your name ain't shit out here I can name some people who really about  
it
