

Lead Me On

Lil Eddie

Oooo yeah, yeah, ooo yeah

Say that you never meant that
Before I believe in you today
It's impossible that your feeling for me baby
The same way, the same way so take it back
Remember I told you from the start
So I'm gunna leave here with a broken heart
I'll promise I will not forgive you
I guess you were just that cold ohh

Her people, her people, and you should know
Cause all you've done is lead me on to let me fall

Get away from me
Let me suffer this injury
Just leave me be
Cause her people, hurt people

Yeah see I knew you wasn't all there
But I still didn't care cause I thought I could turn on your life
Your life your whole life
You pushed me away and it hurts like hell
I love you more then you love yourself
Don't say that you'll throw it away

Her people, her people, and you should know
All you've done is lead me on to let me fall

Get away from me
Let me suffer this injury
Just leave me be
Cause hurt people
Her people, hurt people

I don't wanna cry for you anymore
I was fine before I met you
Ohh how could you do this to me
[?] desprate
My heart was spinning on fate

Her people, her people, you should know
Cause all you've done is lead me on to let me fall

Get away from me
Let me suffer this injury
Just leave me be
Cause her people, hurt people

Cause her people, hurt people
I should've known
