

I'll take you there
So far from here
And pretend that you were never real

Is it hard for you to breathe
With my hands around your throat
I like you better as a ghost
I like you better as a ghost
I caught you lying through your teeth
Turned your necklace to a rope
I like you better as a ghost
I like you better as a ghost

We put your body in a box and watched them bury it
You're so dead to me I'll never see your face again

I'll take you there
So far from here
And pretend that you were never real

If I can't have you no one will
You hate the game and I hate to lose
We always seem to make a mess
I know it's me versus you
You like me better as a ghost
I'd like you better if you choked
You're just so fucked up in the head
I'll like you better when you're dead

We put your body in a box and watched them bury it
You're so dead to me I'll never see your face again

I'll take you there
So far from here
And pretend that you were never real

I like you better as a ghost
(I like you better as a ghost)
I like you better as a ghost
(I like you better as a ghost)

We put your body in a box and watched them bury it
You're so dead to me I'll never see your face again

I'll take you there
So far from here
And pretend that you were never real

We put your body in a box and watched them bury it
You're so dead to me I'll never see your face again
