

If you want, then we can chill behind the high school
I remember what you told me back in high school
Said, "I think you're really cute but you're not that cool"
All your friends are making fun but only you knew
Only we knew

If you want, then we can chill behind the high school
I remember what you told me back in high school
Said, "I think you're really cute but you're not that cool"
All your friends are making fun but only you knew
I come over to your house because you like that
Leave behind a little note and you will write back
It said, "Meet me down the hall and leave your book bag"
We ditch every single class and never look back

Yeah, we kiss to I See Stars in the backseat
But I'm more MCR if you ask me
And you shuffle through the CD's sitting on the dash
Like Warped Tour compilations, I'm alright with that
It's late, you're ignoring all your dad's calls
So if you end up in trouble then it's your fault
But I'll never forget a single thing we do
And when it's time to go just know that I'll miss you

And this is gonna suck when we both go to college
This is gonna suck when you go off to college

If you want, then we can chill behind the high school
I remember what you told me back in high school
Said, "I think you're really cute but you're not that cool"
All your friends are making fun but only you knew
I come over to your house because you like that
Leave behind a little note and you will write back
It said, "Meet me down the hall and leave your book bag"
We ditch every single class and never look back

If you want, then we can chill behind the high school
I remember what you told me back in high school
Said, "I think you're really cute but you're not that cool"
All your friends are making fun but only you knew
I come over to your house because you like that
Leave behind a little note and you will write back
It said, "Meet me down the hall and leave your book bag"
We ditch every single class and never look back

This is gonna suck when we both go to college
This is gonna suck when you go off to college
