

## Avoid

Lil Peep

You'll only see us in the back  
GothBoiClique, all black  
I knew love once, it's hard to forget  
I thought of you and nights spent  
When I'm backed against the wall  
I thought of her and highly  
'Cause she answered when I called  
I want her to wanna hurt me  
And I miss 2013 love songs  
(And I'm so lost), under club lights  
(In the all black), GothBoiClique

GothBoi, I'm the one you can't avoid  
No choice, baby, I be makin' noise  
GothBoi, I'm the one you can't avoid  
No choice, no choice  
Lookin' for you in the back of the club  
Lookin' for her in the back of the club, fucked up  
Everybody know I numb it with the drugs  
Everybody know I numb it with the drugs

(Fucked up in the back of the club)  
Cast a sigil in the back of the club  
(I got scars on me, no love)  
Light a candle and I pray for doves  
(And you're fadin' away, like the pill under my tongue)  
We seriously never even touched, it sucks  
(I'ma put your name in my skin, mix the ink in my blood)  
(It's so fucked)  
So tell me what is love  
(If I ever had it), if I ever had it  
(Did I really want it?)  
(And why can't I remember?)  
I cannot remember  
I took the black two-seater when you pushed me away  
Into the dark, I only want what's best for you, baby  
I reach out to you, but slowly  
If there's passion there, then show me  
Fast, hard  
(It's a slow drug)  
And I swear that  
(But it's true love)  
These are true lines

Saw you in the back of the club again  
And we just started textin' again  
And now you sendin' pictures to my phone, like I just can't resist  
I'm tryin' not to let you feel missed  
And now we're in the bar, like 6 PM  
And now we took a bottle to your bed  
Listenin' to Slowdive, eyes like so-so red  
And I can't stop starin' at the back of your neck  
And you think you can make me love again  
I swear that I will never feel a thing  
Hollow shell, quiet hell, but you're so into me  
Screamin', "Why don't you love me back?"  
'Cause it's GothBoiClique, 'til my lungs collapse

GothBoi, I'm the one you can't avoid  
No choice, baby, I be makin' noise  
GothBoi, I'm the one you can't avoid  
No choice, no choice  
Lookin' for you in the back of the club  
Lookin' for her in the back of the club, fucked up  
Everybody know I numb it with the drugs  
Everybody know I numb it with the drugs
