

No Respect Freestyle

Lil Peep

Cry me a river, I'ma buy you a belt
But the pain's still the same and this guap don't help
(And this guap don't help... at all)
Drop a molly in my Sprite, leave that right on the shelf
Where the white? Where the white? Only time that she yell
Only time that she yell (Only time that she yell)
That ain't right

Ripped jeans, big screens, bad bitch and she 18
She could be my lady, you could be my lady
Hate me, everybody hate me
Every day I wake up, everything achin'

You ain't got no loyalty, then I got no respect
You ain't got no loyalty, then I got no respect
I got no respect, I got no respect
You ain't got no loyalty, then I got no respect

Everybody know I'm next, got these bitches sendin' texts
Bitches sendin' texts 'cause they know that I'm up next, yeah
I'm on a jet, yeah, on a jet
I'm takin' bets, I'm takin' bets
What did you expect? What did you expect?
What did you expect? What did you expect?
What did you expect? What did you expect?
What did you expect, baby?
What did you expect for me to do for you? (for you)
What do you think I have to offer you?
It's cold outside tonight and I
And I don't got a roof over my head
It's cold outside tonight (it's cold outside)
I remember when we shared that same apartment
I loved it, and I... and I, and I
And now I'm holdin' grudges (Holdin' grudges, yeah)
But fuck it, I don't care no more
I don't care, I don't care at all
Not enough, not enough at all

Ripped jeans, big screens, bad bitch and she 18
She could be my lady, you could be my lady
Hate me, everybody hate me
Every day I wake up, everything achin'

You ain't got no loyalty, then I got no respect
You ain't got no loyalty, then I got no respect
I got no respect, I got no respect
Everybody know I'm next, got these bitches sendin' texts

I got no respect, I got no respect
I got no respect, baby, I got no respect for you
I got no respect, yeah
What did you expect? Yeah, yeah
What did you expect?
Everybody hate me, everything achin'
Everything achin'
I got no respect, I got no respect
