

Worlds Away

Lil Peep

Feels like we're a world away
But we in the same room
Be my girl, today at least
She don't even know my name
But she look me in my eyes like she know my pain that's me
And she always let me be myself, she don't ever take bread
She don't need no help that's real
While I'm busy trying to get my wealth
She ain't worry about a thing except my dick and my health that
's real

She sees the things that you don't see
She breathes the air that you don't breathe
She bleeds the blood that you don't bleed
She looks at me like she loves me

Feels like we're a world away
But we in the same room
Be my girl, today at least
She don't even know my name
But she look me in my eyes like she know my pain that's me
And she always let me be myself, she don't ever take bread
She don't need no help that's real
While I'm busy trying to get my wealth
She ain't worry about a thing except my dick and my health that
's real

She sees the things that you don't see
She breathes the air that you don't breathe
She bleeds the blood that you don't bleed
She looks at me like she loves me
