

## Harden

Lil' Wayne

No cap

She love me or leave me, I gave her a reason  
She don't want a reason, she don't wanna see me  
She don't wan' believe me  
I tell her that's cold, I'm already freezin'  
My heart ain't even beatin'  
Just talked to the reaper, he put me on speaker  
He told me to keep ya'

I know I ain't perfect, I shouldn't need to work on  
A nigga been workin', I know you uncertain  
You ride for me and I drive you crazy  
I know I've been swervin', I know you've been nervous  
I know I've been reckless, now you all heartless  
And I was all worthless, I don't deserve it  
You don't deserve this, I turn the blessin' into a burden  
I'm really sorry, I know I don't fix it  
A nigga been wishin', that I go reverse  
And I know I don't helpa and I know that I look selfish  
And looks are deceiving, but you lookin' further  
And you lookin' past me, I'm just a hazbin  
How did this happen? What is the current?  
Where's your endurance?  
You actin' like you've never been in love, like you just a tourist  
You was the purest, 'til you got curious  
You know that love don't come with insurance  
I blame the juries who put me on trial  
They was sick of your smile, now we just cured em'  
That got me furious, people that knew of us  
Tell me "They sorry", I said "That made two of us"  
Wonder what ruined em'  
Wonder how beautiful you look at your wedding while I'm at my funeral  
Goddamn

Love me or leave me

She love me or leave me, I gave her a reason  
She don't want a reason, she don't wanna see me  
She don't wan' believe me  
I tell her that's cold, I'm already freezin'  
My heart ain't even beatin'  
Just talked to the reaper, he put me on speaker  
He told me to keep ya'

I tried to call, but I couldn't reach ya'  
You blocked my number  
I feel like- James Harden, you block my jumper, goddamn

Who you lovin', who you wanna be fuckin'?  
Since it ain't me, just tell that homie "He lucky"  
I'm lonely for nothing', I'm staring' at the phone and the buzzer  
To call em' to come in  
I'm starin' at the walls, I'm been punching' these walls, did me nothing'  
I'm thinkin' about the ball I've been fumbling'  
When stars were abundant  
This shit happened and all of the sudden

The toilet start flushing  
Try to avoid the confrontin', the joy, the consumption  
Where outside noises seduction, it's harder to function  
Look up at the angels, they hoverin', they show me the light  
They told me that I know that I'm wrong, but I don't know what's right  
Goddamn

You must hate me  
Love me or leave me

She love me or leave me, I gave her a reason  
She don't want a reason, she don't wanna see me  
She don't wan' believe me  
I tell her that's cold, I'm already freezin'  
My heart ain't even beatin'  
Just talked to the reaper, he put me on speaker  
He told me to keep ya'

So I tried to call, but I couldn't reach ya'  
You blocked my number  
I feel like- James Harden, you block my jumper, goddamn
