

# With You

Lil' Wayne

Shawty badder than a 3 year old  
keep playing and imma eat her like a pita roll  
Im just sayin with my love I could feed her soul  
two day getaway and we dont need our clothes  
we at the pool and she lookin like a center fold  
two tattoos but she say she gettin plenty mo  
She got Indian in her family, seminol  
me and shawty go together like chemicals  
and she get mad when I call other woman hoes  
you send a rose, I pick some flowers and send her those  
tall glass of Merlot get her in the mode  
two tall glasses of Merlot get her out her robe  
I whisper in her ear, than lick around her lobe  
and when she check her watch, it's never time to go  
and with her brain she should make the honor roll  
And when I came, she caught me like the common cold

God damn you the shit  
and I'll rip my heart out and hand you the shit  
And I dont really know how to handle this shit  
But tonight its moonlight and candles and shit

With you baby  
With you baby  
with you baby  
with you baby  
With you and only you

Uh I say damn I must be left cause you the best I ever seen right  
shawty put me on, you got me gone like some green lights  
See you with your girls, they probably telling that he aint right  
Bet they be the same bitches at the wedding throwing rice  
Lets get together over night  
Shawty Im a pro and you are lookin like the prototype  
But see that I took your advice,  
sometimes you got to blow it twice then shake it up and roll the dice  
Im cruisin on the road of life but I need a passenger  
Appetite for lovin, ma im hungry like a scavenger  
I-I be on that lavender  
I-I be in the bath with her  
Then I gotta go under that water like a mariner

God damn you the shit  
and I'll rip my heart out and hand you the shit  
And I dont really know how to handle this shit  
But tonight its moonlight and candles and shit

With you baby  
With you baby  
with you baby  
with you baby  
With you and only you

Now she dont know about me  
But Imma put her on it  
And she aint show up out me  
But cant go without me

We probably aint supposed to be together  
but I wonder if our love affair her could last forever  
And shawty Im with ya  
Smoke a lot of weed but I could never forget ya  
Then I told her to her face,  
If everyone was like you the World would be a better place

God damn you the shit  
and I'll rip my heart out and hand you the shit  
And I dont really know how to handle this shit  
But tonight its moonlight and candles and shit

With you baby  
With you baby  
with you baby  
with you baby  
With you and only you

God damn you the shit  
and I'll rip my heart out and hand you the shit  
And I dont really know how to handle this shit  
But tonight...

With you baby  
With you baby  
with you baby  
with you baby  
With you and only you
