

Keep Going

Lil Wyte

When the rain is blowing sideways
And you can seem to get yourself out of the driveway
All you wanna do is hit the highway
But you can drive no more, the DUI says
Don't think about the limitations of your mind state
Keep on going on knowing you will find great
Your destination is predetermined some kind say
I'm only journey through purpose through 25 states
Which means I'm halfway there, and I have combined weight
Juggling business and pleasure gonna keep the line straight
I'm a lucky libra so I balance my plate
Plus I pay attention to what all the signs say
Ain't no going back

When the road seems rough and your alone
And you cant find the strength inside to carry on
Cant nobody tell you anything at all
Baby, just keep rollin', just keep going
Keep fighting till your light shinning
You gotta know it ain't the end of the road
So keep on keeping on

Some of us think that we got it the hardest
I cant even speak on it with all that's keeping me bothered
I got bottled up bottles on top of bottomless bottles
I'm an alcoholic with talent like of all of the fallen
I wont miss out on my calling
I got homies that hold me up
Like a crutch when I'm drunk they try to straighten me up
But I'm a mess when I'm stressed
And its so hard to hide it
I battle demons on the daily and I cannot deny it
My career is on the line and I got OG's watching
Waiting to see my next move hoping I keep things popping
I've had fortune and fame, seen it go down the drain
And only I know I can do it right when it come again

When the road seems rough and your alone
And you cant find the strength inside to carry on
Cant nobody tell you anything at all
Baby, just keep rollin', just keep going
Keep fighting till your light shinning
You gotta know it ain't the end of the road
So keep on keeping on

I keep up with the pain, caught up in the rain
It's gotta get better yeah life goes on
I can only struggle for so damn long
Looking for them better days, better days, yeah

Traveled thousands of miles, hitting city after city
Ive rocked the baddest of crowds, I'm sitting here reminiscing
If it all came to a screeching halt today id be straight
Just knowing one life was changed from this music I make
I gotta keep believing in my self
The ones I keep around me and love are my true wealth
It's been a long ride and I ain't about to turn back now

If I had to get a regular job I wouldn't know how
Gotta reframe and start back fresh
Can't stay in bed all day long claiming I'm depressed
I gotta get up get out and get back on my grind
I cant complain I have some issues but I'll be fine

When the road seems rough and your alone
And you cant find the strength inside to carry on
Cant nobody tell you anything at all
Baby, just keep rollin', just keep going
Keep fighting till your light shinning
You gotta know it ain't the end of the road
So keep on keeping on

Keep going, keep fighting...
