

# Misery

Lil Xan

I don't understand why you have to go and do that  
Who that? New kid, no life  
I swear if I don't start taking this more seriously, they always end up leaving me  
My people they believe in me  
My family tree is rooted deep  
So don't you cut those leaves you fucking freak, I'm freaking out

Cause I just found out, a bunch of stuff about my whole life history  
And now I'm running to the beach  
So I can hit the waves and hopefully drift to Italy and hide away from everything  
I'll runaway  
I'll get away  
My life is still a misery  
She told me that she needed me  
Was everyday deceiving me  
I wish that she believed in me  
Deleted pictures off my phone last night  
So I hope that you don't feel some type  
Landed in LA, model bitches love me when I'm actually pretty lame, but that's beside the point  
I'm tryna spit the facts  
If you ain't fucking with us than you gon' get left back

I don't understand why you have to go and do that  
Who that? New kid, no life  
I swear if I don't start taking this more seriously, they always end up leaving me  
My people they believe in me  
My family tree is rooted deep  
So don't you cut those leaves you fucking freak, I'm freaking out

I'm freaking out  
I'm freaking out
