

New Names

Lily Kershaw

Let's go take the old road
Give ourselves new names
Let's go take the old road
And loose all our shame
And not be scared in the dark
When our lives fall apart
Let's take the old road and get new names
There was a time when you held me
And I was safe in your arms
There was a time when darkness
Didn't mean no harm

We keep burning
Not returning to what has happened here
Slowly softly learning how to un-die my dear

Let's go take the old road
Give ourselves new names
Let's go take the old road
And loose all our shame
And not be scared in the dark
When our lives fall apart
Let's take the old road and get new names

Take me disappearing
I've always wanted to go
Take me to places
I have yet to know

We keep burning
Not returning to what has happened here
Slowly softly learning how to un-die my dear

Let's go take the old road
Give ourselves new names
Let's go take the old road
And loose all our shame
And not be scared in the dark
As our lives fall apart
Let's take the old road and get new names
