

# Ergonomics

Limahl

I buy things that are made to measure  
I like to throw 'em around, hit it  
Opened cullender throw the handle  
They come together and they make a big sound  
They come together and they make a big sound

Variety is the proposition  
Modern is out of date, hit it  
Neatest fitting comfy handles  
They come together and they make a big sound  
They come together and they make a big sound

CHORUS

All across the land  
It's made for the land  
All across the land  
It's made for the land

Mould and patterns add to interest  
Hand made on a hand made face, hit it  
Made and curved by ergonomics  
They come together and they make a big sound  
They come together and they make a big sound

Repeat CHORUS

Ergonomics are efficient  
Make you think in symmetry  
Use the manual it's tradition  
Made to aid you insantly

Repeat CHORUS to fade.
