Everything Else

Lime Cordiale

Waking up to no more day
There's no time to relax
My mind is just not clear
There's no time to relax
There's so much that distracts

Seasick and I'm prescribed
Because there's no time to get well
I'll push you aside there's things to do.
'Cause there's no time to relax
No landline or fax

What I've been told
Oh when you get old
What we get told We all cover it up

We have made ourselves, so safe from everything else
When do we have the time?
Now we're doing everything else
On top of everything else
When do we have the time?

Gotta' get up above the noise
But we are all playing with the same old toys
We're all paying these suits too much
I got conned, I've got contract.

Its just like honeycomb
On and on it goes
Nothings going to resolve
It's something you can hold

We have made ourselves, so safe from everything else
When do we have the time?
Now we're doing everything else
On top of everything else
When do we have the time?

We have made ourselves, so safe from everything else
When do we have the time?
Now we're doing everything else
On top of everything else
When do we have the time?
