

Colors

Limi

I've been missing, yeah
Down for something different
Lately
I've made decisions in the past
That felt like I'm not living for me

Do it now
There's no time to be wasted
When it's gone you can never replace it
You make the world feel like a new place, yeah
When I look into your eyes

Deep under water
Waves got me floating
All that we're holding
Is safe with us

I feel alive when I see you smile
Lately I've been feeling different
It's been gray, clouding up the sky
But I see the colors in the distance
I feel alive when it's you and I
When you're gone there's something missing
When there's gray clouding up my sky
You make me see the colors in the distance

Colors in the distance
In the picture, cause you see the vision
Mmm-mm
It's the way you make a difference
When it's time, I don't want nobody different
Yeah
Up on the top
Know our love would never die
Got no options
Could never tell the one goodbye
On a roll
There's no limits to our sky
When it's you and I

Deep under water
Waves got me floating
All that we're holding
Is safe with us

I feel alive when I see you smile
Lately I've been feeling different
It's been gray, clouding up the sky
But I see the colors in the distance
I feel alive when it's you and I
When you're gone there's something missing
When there's gray clouding up my sky
You make me see the colors in the distance
