

## Different Planet

Lion Babe

Tell me how I feel so deep  
I must be from a different planet  
Must be from a different planet  
Tell me why they fear unique  
I must be from a different planet  
Must be from a different planet  
Tell me if you hear me speak  
You must be from a different planet  
Must be from a different planet  
Looking for my place to be  
I must be from a different planet  
From a different planet

I can't understand how we play it so cool  
You on my radar wonder what you're made of  
Waiting for the moment when we go and break the rules  
Show me what you're made of, we can start a chain reaction  
Take it off, don't control it, aw yeah  
Aw I'm involved, you can show it, aw yeah  
Way up, you could lose a layer  
Are you gonna wake up all that I need below?

Tell me how I feel so deep  
I must be from a different planet  
Must be from a different planet  
Tell me why they fear unique  
I must be from a different planet  
Must be from a different planet  
Tell me if you hear me speak  
You must be from a different planet  
Must be from a different planet  
Looking for my place to be  
I must be from a different planet  
From a different planet

Hey I'm looking at you from a distant point of view  
Hey get me where I need to be soon, don't you know I been ready  
?  
You hold me like you know we always gonna be  
Feeling like you're made up, now we're making love on our own rotation

I must be from a different planet  
Must be from a different planet  
I must be from a different planet  
Must be from a different planet
