# Rainbows

**Lion Babe**

Rainbows
Rainbows
Rainbows
Rainbows

We'll promise to begin
Keep going understand
When we are feeling low
Don't know which way to go
Look for the moment
There will be hallelujah
Beneath the fear in me
All I need to send me over
All the way
All the way over
I see the colors show
I know which way to go

Rainbows
(We can, we gonna make this change
I can, I got a long way ahead of me)
Rainbows
(We can we gonna do this finally
Why can't we all)
Rainbows
(We can, we gonna make this change
I can, I got a long way ahead of me)
Rainbows
(Gonna do this finally)

Exorbitant light colors this rainbow Sith
Like a box of fruit loops, what I wear on my wrist
I feel an energy forming, coming out of the mist
Was it divine revelation? Always know to exist
It was LOVE, in capital letters, the devils fear it
A lot of darkness in this life, so I follow the spirit
'Cause it's too much hate, like it's thriving off a battery
The hole that we digging ourselves resembles a cavity
Mass killings with bad feelings and racist threats
When asked why, the answer never seems to connect
Bent halos placed over the head of these fake angels
The ones that think they better than you, from all angles
Only one god, one love, one truth
All ya'll non-believers scare me, all of ya'll in cahoots
We need to hug more, form one alliance to make it better
Weather the storm and unite for what's right, and stand together

And it comes and it goes for ya
Not when it's supposed to be
Letting it all air
Taking it all back
Aware of miracles
Unlike the cynical
We're young and have to grow
Got nowhere else to go

Rainbows

```
(We can, we gonna make this change
I can, I got a long way ahead of me)
Rainbows
(We can we gonna do this finally
Why can't we all)
Rainbows
(We can, we gonna make this change
I can, I got a long way ahead of me)
Rainbows
(We can we gonna do this finally
Why can't we all)
(Long way long way long way)

Rainbows
(We can, we gonna make this change
I can, I got a long way ahead of me)
Rainbows
(We can we gonna do this finally
Why can't we all)
```
