

# I Control the Sun

Lisa Loeb

I control the sun  
I turn on the stars  
I make all the colors that you see as you circle me  
I open up the sky  
I control the speed  
I can make the green lights flash  
I can make you crash

Barely makes a sound  
You stop when you slow down

I can't make you see things the way I see them  
I can't make you feel things the way I feel them  
I can't wait around for you  
I've got better things to do

Cuz I control the sun  
I cool down the heat  
I can make the walls spin around and raise the ground  
I control the world  
I can make it flat  
I can make the water deep so I can save you from the sea

Stop when you slow down  
Afraid that you would drown

I can't make you see things the way I see them  
I can't make you feel things the way I feel them  
I can't wait around for you  
I've got better things to do

I pushed every button  
I pulled every string  
I've tried every lever  
I've tried everything

Barely makes a sound  
Stop when you slow down

I can't make you see things the way I see them  
I can't make you feel things the way I feel them  
I can't wait around for you  
I've got better things to do

Cuz I control the sun  
I control the sun  
If I can control the sun  
Then why can't I have you?  
I've got better things to do
