

Parachute

Lisa Lois

We all need a hand to hold
A place our troubles can unfold
Somewhere safe to lay and wait out the storm
We all need a place to fall
The arms of someone when we call
Someone there to prove to us
That we're not alone
And I can't tell you what you mean
I can't imagine where I'd be
You've always been the one that kept me on my feet
But this time I need to fly
With everything to lose
Without a parachute
And let the rain fall
Let myself free fall
To see what I can do
Without a parachute
There's a caution in the wind
That makes it hard to depend
On the people who we know feel like home
It might seem random, might seem wrong
Our hearts in tandem for so long
But I need to take the chance to be on my own
And I can't tell you what you mean
I can't imagine where I'd be
You've always been the one that kept me on my feet
But this time I need to fly
With everything to lose
Without a parachute
And let the rain fall
Let myself free fall
To see what I can do
Without a parachute
I won't break
I've got your love to keep me strong
I Just need some space
But it won't mean I'm gone
But this time I need to fly
With everything to lose
Without a parachute
And let the rain fall
Let myself free fall
To see what I can do
Without a parachute
