

Love Will Wait

Lisa Stansfield

Love that will wait forever
When they can be together
And apart at the same time
Love that will wait forever
Time has no bond on to keep this heart
When they can be together
And apart at the same time

Although, while you gone, the love still carries on
Instead erased, but we feel it's real
Because, I know, that you're here in my heart
Warming me inside, until the fire is real

(Chorus)

Love that will wait forever
Time has no bond on to keep this heart
When they can be together
And apart at the same time
Love that will wait forever
Time has no bond on to keep this heart
When they can be together
And apart at the same time

Now, in my mind, seems to lie upon the good times
We spent, sharing love, in the hope that we could share again
The time, like before, for me you've opened up the door
But to make this again like we never had before

(Chorus)

It's been worth it, just to see your smile
Your laughter makes it all worthwhile
It's been worth the waiting for
All the doubts in my mind is simply final
(Chorus)
